MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 66 (1992/3)

Adherence, macrophages, fibronectin, collagen, aging, 149
Adrenocorticocyte, aging, hepatocyte, testosterone, hyperpolarization, Na,K-ATPase, hyperpolarization factor, 187
Age, glycosidases, urine, proteinuria, rat, 121
Age, hypertrophy, training, isometric contractions, fatigue, skeletal muscle, 297
Ageing, Senieur protocol, human, immunoglobulins, monoclonal gammapathies, 29
Ageing, Senieur protocol, immune response, 1
Ageing, Senieur, *Helix pomatia* haemocyanin, antibodies, CAPD, haemodialysis, 15
Aging rate, aging, primates, crab-eating monkeys, cardiac lipfuscin, 243
Aging, DNA, mRNA, gene expression, 283
Aging, free radicals, glutathione peroxidase, glutathion reductase, human blood, malondialdehyde, 213
Aging, hepatocyte, adrenocorticocyte, testosterone, hyperpolarization, Na,K-ATPase, hyperpolarization factor, 187
Aging, hippocampal formation, parvalbumin, calbindin, immunohistochemistry, 195
Aging, hippocampus, mossy fibres, choline alfoscerate, rat, 81
Aging, inorganic sulfate, renal clearance, turnover, rat, 257
Aging, macrophages, adherence, fibronectin, collagen, 149
Aging, mortality, epidemiology, Gompertzian analysis, 45
Aging, mortality, Gompertzian analysis, information theory, natural selection, 249
Aging, primates, crab-eating monkeys, cardiac lipfuscin, aging rate, 243
Aging, secretory immunity, *Mycoplasma pulmonis*, 131
Aging, senescence, mortality, Gompertz, simplex, *Caenorhadbitis elegans*, 269
Alzheimer's disease, free radicals, susceptibility, fibroblasts, xanthine oxidase, 117
Aminophylline, Chinese herbal medicine-western drug interaction, Huan Shao Tan, Pu Chung Yi Chi Tang, pharmacokinetics, cytochrome *P*-450, 93
Amyotrophic lateral sclerosis, Gompertzian analysis, population modelling, multiple sclerosis, mortality, 223
Antibodies, ageing, Senieur, *Helix pomatia* haemocyanin, CAPD, haemodialysis, 15

Biotransformation, pharmacokinetics, theophylline, Mongolian gerbil (*Meriones unguiculatus*), 173
Bone development, run-trained, swim-trained, citrate synthase activity, 59

Caenorhadbitis elegans, aging, senescence, mortality, Gompertz, simplex, 269
Calbindin, aging, hippocampal formation, parvalbumin, immunohistochemistry, 195
CAPD, ageing, Senieur, *Helix pomatia* haemocyanin, antibodies, haemodialysis, 15
Cardiac lipfuscin, aging, primates, crab-eating monkeys, aging rate, 243
Cell proliferation, in vitro senescence, endothelial cells, epidermal growth factor, suppression of in vitro senescence, PGI_2 production, 107
Cellular senescence, proliferating cell nuclear antigen, 71
Chinese herbal medicine-western drug interaction, Huan Shao Tan, Pu
Chung Yi
Chi Tang, Aminophylline, pharmacokinetics, cytochrome *P*-450, 93
Choline alfoscerate, hippocampus, aging, mossy fibres, rat, 81
Citrate synthase activity, run-trained, swim-trained, bone development, 59
Collagen, macrophages, adherence, fibronectin, aging, 149
Crab-eating monkeys, aging, primates, cardiac lipfuscin, aging rate, 243
Cultured cells, heavy metals, lipofuscin, lysosomes, myocytes, oxygen radicals, 159

Cytochrome *P*-450, Chinese herbal medicine-western drug interaction, Huan Shao Tan, Pu Chung Yi Chi Tang, Aminophylline, pharmacokinetics, 93

DNA, aging, mRNA, gene expression, 283

Endothelial cells, in vitro senescence, epidermal growth factor, suppression of in vitro senescence, cell proliferation, PGI_2 production, 107
Epidemiology, aging, mortality, Gompertzian analysis, 45
Epidermal growth factor, in vitro senescence, endothelial cells, suppression of in vitro senescence, cell proliferation, PGI_2 production, 107

Fatigue, hypertrophy, training, age, isometric contractions, skeletal muscle, 297
Fibroblasts, Alzheimer's disease, free radicals, susceptibility, xanthine oxidase, 117
Fibronectin, macrophages, adherence, collagen, aging, 149
Free radicals, aging, glutathione peroxidase, glutathion reductase, human blood, malondialdehyde, 213
Free radicals, Alzheimer's disease, susceptibility, fibroblasts, xanthine oxidase, 117

Gene expression, aging, DNA, mRNA, 283
Glutathion reductase, aging, free radicals, glutathione peroxidase, human blood, malondialdehyde, 213
Glutathione peroxidase, aging, free radicals, glutathion reductase, human blood, malondialdehyde, 213
Glycosidases, age, urine, proteinuria, rat, 121
Gompertz, aging, senescence, mortality, simplex, *Caenorhadbitis elegans*, 269
Gompertzian analysis, aging, mortality, epidemiology, 45
Gompertzian analysis, aging, mortality, information theory, natural selection, 249
Gompertzian analysis, population modelling, amyotrophic lateral sclerosis, multiple sclerosis, mortality, 223
Haemodialysis, ageing, Senieur, *Helix pomatia* haemocyanin, antibodies, CAPD, 15
Heavy metals, cultured cells, lipofuscin, lysosomes, myocytes, oxygen radicals, 159
Helix pomatia haemocyanin, ageing, Senieur, antibodies, CAPD, haemodialysis, 15
Hepatocyte, aging, adrenocorticocyte, testosterone, hyperpolarization, Na,K-ATPase, hyperpolarization factor, 187
Hippocampal formation, aging, parvalbumin, calbindin, immunohistochemistry, 195
Hippocampus, aging, mossy fibres, choline alfoscerate, rat, 81
Huan Shao Tan, Chinese herbal medicine-western drug interaction, Pu Chung Yi Chi Tang, Aminophylline, pharmacokinetics, cytochrome *P*-450, 93
Human blood, aging, free radicals, glutathione peroxidase, glutathion reductase, malondialdehyde, 213
Human, ageing, Senieur protocol, immunoglobulins, monoclonal gammapathies, 29
Hyperpolarization factor, aging, hepatocyte, adrenocorticocyte, testosterone, hyperpolarization, Na,K-ATPase, 187
Hyperpolarization, aging, hepatocyte, adrenocorticocyte, testosterone, Na,K-ATPase, hyperpolarization factor, 187
Hypertrophy, training, age, isometric contractions, fatigue, skeletal muscle, 297

Immune response, ageing, Senieur protocol, 1
Immunoglobulins, ageing, Senieur protocol, human, monoclonal gammapathies, 29
Immunohistochemistry, aging, hippocampal formation, parvalbumin, calbindin, 195
In vitro senescence, endothelial cells, epidermal growth factor, suppression of in vitro senescence, cell proliferation, PGI_2 production, 107
Information theory, aging, mortality, Gompertzian analysis, natural selection, 249
Inorganic sulfate, renal clearance, aging, turnover, rat, 257
Isometric contractions, hypertrophy, training, age, fatigue, skeletal muscle, 297

Lipofuscin, cultured cells, heavy metals, lysosomes, myocytes, oxygen radicals, 159
Lysosomes, cultured cells, heavy metals, lipofuscin, myocytes, oxygen radicals, 159

Macrophages, adherence, fibronectin, collagen, aging, 149
Malondialdehyde, aging, free radicals, glutathione peroxidase, glutathion reductase, human blood, 213
Mongolian gerbil (*Meriones unguiculatus*), pharmacokinetics, biotransformation, theophylline, 173

Monoclonal gammapathies, ageing, Senieur protocol, human, immunoglobulins, 29
Mortality, aging, epidemiology, Gompertzian analysis, 45
Mortality, aging, Gompertzian analysis, information theory, natural selection, 249
Mortality, aging, senescence, Gompertz, simplex, *Caenorhadbitis elegans*, 269
Mortality, Gompertzian analysis, population modelling, amyotrophic lateral sclerosis, multiple sclerosis, 223
Mossy fibres, hippocampus, aging, choline alfoscerate, rat, 81
mRNA, aging, DNA, gene expression, 283
Multiple sclerosis, Gompertzian analysis, population modelling, amyotrophic lateral sclerosis, mortality, 223
Myocytes, cultured cells, heavy metals, lipofuscin, lysosomes, oxygen radicals, 159
Mycoplasma pulmonis, aging, secretory immunity, 131

Na,K-ATPase, aging, hepatocyte, adrenocorticocyte, testosterone, hyperpolarization, hyperpolarization factor, 187
Natural selection, aging, mortality, Gompertzian analysis, information theory, 249

Oxygen radicals, cultured cells, heavy metals, lipofuscin, lysosomes, myocytes, 159

Parvalbumin, aging, hippocampal formation, calbindin, immunohistochemistry, 195
PGI_2 production, in vitro senescence, endothelial cells, epidermal growth factor, suppression of in vitro senescence, cell proliferation, 107
Pharmacokinetics, biotransformation, theophylline, Mongolian gerbil (*Meriones unguiculatus*), 173
Pharmacokinetics, Chinese herbal medicine-western drug interaction, Huan Shao Tan, Pu Chung Yi Chi Tang, Aminophylline, cytochrome *P*-450, 93
Population modelling, Gompertzian analysis, amyotrophic lateral sclerosis, multiple sclerosis, mortality, 223
Primates, aging, crab-eating monkeys, cardiac lipfuscin, aging rate, 243
Proliferating cell nuclear antigen, cellular senescence, 71
Proteinuria, age, glycosidases, urine, rat, 121
Pu Chung Yi Chi Tang, Chinese herbal medicine-western drug interaction, Huan Shao Tan, Aminophylline, pharmacokinetics, cytochrome *P*-450, 93

Rat, age, glycosidases, urine, proteinuria, 121
Rat, hippocampus, aging, mossy fibres, choline alfoscerate, 81
Rat, inorganic sulfate, renal clearance, aging, turnover, 257
Renal clearance, inorganic sulfate, aging, turnover, rat, 257
Run-trained, swim-trained, bone development, citrate synthase activity, 59

Secretory immunity, aging, *Mycoplasma pulmonis*, 131
Senescence, aging, mortality, Gompertz, simplex, *Caenorhadbitis elegans*, 269
Senieur protocol, ageing, human, immunoglobulins, monoclonal gammapathies, 29
Senieur protocol, ageing, immune response, 1
Senieur, ageing, *Helix pomatia* haemocyanin, antibodies, CAPD, haemodialysis, 15
Simplex, aging, senescence, mortality, Gompertz, *Caenorhadbitis elegans*, 269
Skeletal muscle, hypertrophy, training, age, isometric contractions, fatigue, 297
Suppression of in vitro senescence, in vitro senescence, endothelial cells, epidermal growth factor, cell proliferation, PGI_2 production, 107
Susceptibility, Alzheimer's disease, free radicals, fibroblasts, xanthine oxidase, 117
Swim-trained, run-trained, bone development, citrate synthase activity, 59

Testosterone, aging, hepatocyte, adrenocorticocyte, hyperpolarization, Na,K-ATPase, hyperpolarization factor, 187
Theophylline, pharmacokinetics, biotransformation, Mongolian gerbil (*Meriones unguiculatus*), 173
Training, hypertrophy, age, isometric contractions, fatigue, skeletal muscle, 297
Turnover, inorganic sulfate, renal clearance, aging, rat, 257

Urine, age, glycosidases, proteinuria, rat, 121

Xanthine oxidase, Alzheimer's disease, free radicals, susceptibility, fibroblasts, 117
